Subject: GREENWAY TRAIL PROJECT
FORMER UNION PACIFIC RAILROAD PROPERTY
WHITTIER, CALIFORNIA
REPORT - PHASE I ENVIRONMENTAL SITE ASSESSMENT

Dear Mr. Trost:

In accordance with your request on behalf of the City of Whittier, Geocon Consultants, Inc. has conducted a Phase I Environmental Site Assessment (Phase I ESA) of the site. The site is an abandoned 5.2-mile section of the Union Pacific Railroad within the City of Whittier, California. The Phase I ESA report consists of two volumes. Volume 1 consists of all Phase I ESA documents excluding Appendix E. Volume 2 contains Appendix E, the environmental database information provided by Environmental Data Resources, Inc. (EDR).

We trust the accompanying report provides the City of Whittier with the information you require at this time. If you have any questions regarding the information presented in the report, or if Geocon may be of further service, please contact us at (213) 538-1282.

Sincerely,

GEOCON CONSULTANTS, INC.

Curtis M. Welty, RG
Senior Geologist

Robin J. Ferber, RG, REA
Senior Managing Geologist

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc. (EDR).

The address of the subject property for which the search was intended is:

WHITTIER PROJECT
WHITTIER, CA 90601

No mapped sites were found in EDR's search of available ("reasonably ascertainable ") government records within the requested search area for the following Databases:

Delisted NPL:	NPL Deletions
RCRIS-TSD:	Resource Conservation and Recovery Information System
AWP:	AWP
Notify 65:	Notify 65
Toxic Pits:	Toxic Pits
AST:	Aboveground Petroleum Storage Tank Facilities
PADS:	PCB Activity Database System
TSCA:	Toxic Substances Control Act
MLTS:	Material Licensing Tracking System
Ca. BEP:	CA Bond Exp. Plan
CONSENT:	Superfund (CERCLA) Consent Decrees
SMS R_2:	South Bay Site Management System
MINES:	Mines Master Index File

Unmapped (orphan) sites are not considered in the foregoing analysis.

EXECUTIVE SUMMARY

Search Results:

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

NPL: Also known as Superfund, the National Priority List database is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund program. The source of this database is the U.S. EPA.

A review of the NPL list, as provided by EDR, and dated 07/22/1999 has revealed that there are 2 NPL sites within the searched area.

EXECUTIVE SUMMARY

CORTESE: This database identifies public drinking water wells with detectable levels of contamination, hazardous substance sites selected for remedial action, sites with known toxic material identified through the abandoned site assessment program, sites with USTs having a reportable release and all solid waste disposal facilities from which there is known migration. The source is the California Environmental Protection Agency/Office of Emergency Information.

A review of the Cortese list, as provided by EDR, has revealed that there are 44 Cortese sites within the searched area.

EXECUTIVE SUMMARY

CERCLIS: The Comprehensive Environmental Response, Compensation and Liability Information System contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA).
CERCLIS contains sites which are either proposed to or on the National Priorities List (NPL) and sites which are in the screening and assessment phase for possible inclusion on the NPL.

A review of the CERCLIS list, as provided by EDR, and dated 08/26/1999 has revealed that there are 3 CERCLIS sites within the searched area.

Site	Address	Map ID	Page

DOLCO PACKAGING	***4850 GREGG RD***	***55***	***82***
OMEGA CHEMICAL SITE PRP ORG GP	***12504 E WHITTIER BLVD***	***171***	***238***

CERCLIS-NFRAP: As of February 1995. CERCLIS sites designated "No Further Remedial Action Planned" (NFRAP) have been removed from CERCLIS. NFRAP sites may be sites where, following an initial investigation, no contamination was found, contamination was removed quickly without the need for the site to be placed on the NPL, or the contamination was not serious enough to require Federal Superfund Action or NPL consideration. EPA has removed approximately 25,000 NFRAP sites to lift the unintended barriers to the redevelopment of these properties and has archived them as historical records so EPA does not needlessly repeat the investigations in the future. This policy change is part of the EPA's Brownfields Redevelopment Program to help cities, states, private investors and affected citizens to promote economic redevelopment of unproductive urban sites.

A review of the CERC-NFRAP list, as provided by EDR, and dated 08/26/1999 has revealed that there are 6 CERC-NFRAP sites within the searched area.

KATZ DUMP	*BROADWAY / VICTORIA*	*295*	*441*

HAZNET: The data is extracted from the copies of hazardous waste manifests received each year by the DTSC. The annual volume of manifests is typically 700,000-1,000,000 annually, representing approximately 350,000-500,000 shipments. Data from non-California manifests & continuation sheets are not included at the present time. Data are from the manifests submitted without correction, and therefore many contain some invalid values for data elements such as generator ID, TSD ID, waste category. & disposal method. The source is the Department of Toxic Substance Control is the agency

A review of the HAZNET list, as provided by EDR, has revealed that there are 392 HAZNET sites within the searched area.

RCRIS: The Resource Conservation and Recovery Act database includes selected information on sites that generate, store, treat, or dispose of hazardous waste as defined by the Act. The source of this database is the U.S. EPA.

A review of the RCRIS-SQG list, as provided by EDR, and dated 09/01/1999 has revealed that there are 139 RCRIS-SQG sites within the searched area.

FINDS: The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/01/1999 has revealed that there are 161 FINDS sites within the searched area.

NPL LIENS: This database contains a list of federal Superfund liens. Under the authority granted the United States Environmental Protection Agency by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the U.S. EPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. The source of this database is the U.S. EPA.

A review of the NPL Lien list, as provided by EDR, has revealed that there is 1 NPL Lien site within the searched area.

Site Description: The 43-acre Waste Disposal, Inc. (WDI) Superfund site is located in the city of Santa Fe Springs, Los Angelos County, California. The facility is bordered on the northwest by Santa Fe Springs Road, on the northeast by Fedco Food Distribution Center (Fedco) and St. Paul High School, on the southwest by Los Nietos Road, and on the southeast by Greenleaf Avenue. Residences are located across from the facility on Greenleaf Avenue. The remaining areas on and across Los Nietos Road and Santa Fe Spr ings Road are occupied by industrial complexes. The WDI site contains a 42 million gallon capacity concrete reservoir originally constructed for crude petroleum storage. The reservoir was decommissioned in the late 1920s for product storage, and wa s subsequently used for disposing of a variety of industrial wastes. Disposal activities continued unregulated until 1949, and thereafter under permit from Los Angelos County, until closure in 1964. WDI stopped accepting wastes in 1964, bringing in fill and covering the site, including the reservoir.

The site was placed on the National Priorities List in 1987. Following the site listing, EPA sent general notice letters to 28 potentially responsible parties (PRPs). However, no party came forward with a good faith offer to conduct the remedial inv estigation (RI), so, EPA began the RI. In 1988, EPA undertook a removal action, erecting a fence around one corner of the site to improve site security and prevent accidental exposure to surface contamination. EPA completed the RI in November 1990 , and initiated a feasibility study (FS). In January 1992, EPA began three quarters of ground water monitoring, culminating in the January 1993 Groundwater Sampling Report. EPA decided to divide the site into two operable units so that more informa tion could be collected for ground water without delaying the decision for the remaining contaminated media. In August 1993, EPA completed the FS for contaminated soils and subsurface gases. The contamination present on-site at WDI exists in the so il and ground water matrices, and in the form of subsurface gases. Present in on-site soils are large amounts of oil well drilling muds and sludges and waste producrs, metals, low concentractions of volatile organic compounds and semivolatile organi c compounds, low concentrations of pesticides and PCBs, and lead. Methane is the most prevalent subsurface gas, with the highest concentrations in the reservoir area.

WASTE DISPOSAL, INC. (Continued) **1000397104**

Volatile organic compounds (vinyl chloride and benzene) also were detected in the subsurface gas both within and outside the reservoir area. This ROD does not address ground water.

Agency Contact: NANCY GEDDESS
Agency Phone: (530) 389-9614
Design Flow: 0.0100 Million Gal/Day
Baseline Flow: 0.0290 Million Gal/Day
Facility Type: Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).
Facility Status: Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.
Agency Type: Private
Waste Type: Domestic Sewage - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.
Threat to Water: Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic imapirment would include nuisance from a waste treatment facility.
Complexity: Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.
Reclamation: No reclamation requirements associated with this facility.
POTW: The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.

Agency Name:	Pico Water District		
Agency Addr:	484 S. Church St. Pico Rivera, CA 90660		
Agency Contact:	Joseph Dermody	Agency Phone:	(562) 692-3756
Design Flow:	3.0000 Million Gal/Day	Baseline Flow:	3.0000 Million Gal/Day
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)		
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.		
Agency Type:	Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)		
Waste Type:	Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type) - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.		
Threat to Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compaired to a major or minor threat. Not: All nurds withoug a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.		
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.		
Reclamation:	No reclamation requirements associated with this facility.		
POTW:	The facility is not a POTW.		
NPDES Number:	CAG9940 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board		
Subregion:		4	
Frequency of Reporting to Regional Board:		Quarterly Submittal	
Resource Conservation and Recovery Act (RCRA) Facility:		No	
Project Official's Initials:		Not reported
