**FINDS:** The Facility Index System contains both facility information and "pointers" to other sources of information that contain more detail. These include: RCRIS; Permit Compliance System (PCS); Aerometric Information Retrieval System (AIRS); FATES (FIFRA [Federal Insecticide Fungicide Rodenticide Act] and TSCA Enforcement System, FTTS [FIFRA/TSCA Tracking System]; CERCLIS; DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes); Federal Underground Injection Control (FURS); Federal Reporting Data System (FRDS); Surface Impoundments (SIA); TSCA Chemicals in Commerce Information System (CICS); PADS; RCRA-J (medical waste transporters/disposers); TRIS; and TSCA. The source of this database is the U.S. EPA/NTIS.

A review of the FINDS list, as provided by EDR, and dated 04/01/1999 has revealed that there are 161 FINDS sites within the searched area.

**NPL LIENS:** This database contains a list of federal Superfund liens. Under the authority granted the United States Environmental Protection Agency by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) of 1980, the U.S. EPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner receives notification of potential liability. The source of this database is the U.S. EPA.

A review of the NPL Lien list, as provided by EDR, has revealed that there is 1 NPL Lien site within the searched area.

Site Description:

The 43-acre Waste Disposal, Inc. (WDI) Superfund site is located in the city of Santa Fe Springs, Los Angeles County, California. The facility is bordered on the northwest by Santa Fe Springs Road, on the northeast by Fedco Food Distribution Center (Fedco) and St. Paul High School, on the southwest by Los Nietos Road, and on the southeast by Greenleaf Avenue. Residences are located across from the facility on Greenleaf Avenue. The remaining areas on and across Los Nietos Road and Santa Fe Springs Road are occupied by industrial complexes. The WDI site contains a 42 million gallon capacity concrete reservoir originally constructed for crude petroleum storage. The reservoir was decommissioned in the late 1920s for product storage, and was subsequently used for disposing of a variety of industrial wastes. Disposal activities continued unregulated until 1949, and thereafter under permit from Los Angeles County, until closure in 1964. WDI stopped accepting wastes in 1964, bringing in fill and covering the site, including the reservoir.

The site was placed on the National Priorities List in 1987. Following the site listing, EPA sent general notice letters to 28 potentially responsible parties (PRPs). However, no party came forward with a good faith offer to conduct the remedial investigation (RI), so, EPA began the RI. In 1988, EPA undertook a removal action, erecting a fence around one corner of the site to improve site security and prevent accidental exposure to surface contamination. EPA completed the RI in November 1990, and initiated a feasibility study (FS). In January 1992, EPA began three quarters of ground water monitoring, culminating in the January 1993 Groundwater Sampling Report. EPA decided to divide the site into two operable units so that more information could be collected for ground water without delaying the decision for the remaining contaminated media. In August 1993, EPA completed the FS for contaminated soils and subsurface gases. The contamination present on-site at WDI exists in the soil and ground water matrices, and in the form of subsurface gases. Present in on-site soils are large amounts of oil well drilling muds and sludges and waste products, metals, low concentrations of volatile organic compounds and semivolatile organic compounds, low concentrations of pesticides and PCBs, and lead. Methane is the most prevalent subsurface gas, with the highest concentrations in the reservoir area.

Volatile organic compounds (vinyl chloride and benzene) also were detected in the subsurface gas both within and outside the reservoir area. This ROD does not address ground water.

Facility Contact:	NANCY GEDDESS	Facility Telephone:	Not reported
SIC Code:	7011	SIC Code 2:	7033
Agency Name:	NACO WEST/SNOWFLOWER* INC.		
Agency Addr:	41776 YUBA GAP DR. EMIGRANT GAP, CA 95715		
Agency Contact:	NANCY GEDDESS	Agency Phone:	(530) 389-9614
Design Flow:	0.0100 Million Gal/Day	Baseline Flow:	0.0290 Million Gal/Day
Facility Type:	Municipal/Domestic - Facility that treats sewage or a mixture of predominantly sewage and other waste from districts, municipalities, communities, hospitals, schools, and publicly or privately owned systems (excluding individual subsurface leaching systems disposing of less than 1,000 gallons per day).		
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.		
Agency Type:	Private		
Waste Type:	Domestic Sewage - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.		
Threat to Water:	Moderate Threat to Water Quality. A violation could have a major adverse impact on receiving biota, can cause aesthetic impairment to a significant human population, or render unusable a potential domestic or municipal water supply. Awsthetic imapirment would include nuisance from a waste treatment facility.		
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or thosewho must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.		
Reclamation:	No reclamation requirements associated with this facility.		
POTW:	The POTW Does not have an approved pretreatment program. Some POTWs may have local pretreatment programs that have not been approved by the regional board and/or EPA.

WDS:

Facility ID:	Los Angeles River 19600011		
Facility Contact:	Adrian Diaz	Facility Telephone:	(310) 692-3756
SIC Code:	9999	SIC Code 2:	Not reported
Agency Name:	Pico Water District		
Agency Addr:	484 S. Church St. Pico Rivera, CA 90660		
Agency Contact:	Joseph Dermody	Agency Phone:	(562) 692-3756
Design Flow:	3.0000 Million Gal/Day	Baseline Flow:	3.0000 Million Gal/Day
Facility Type:	Other - Does not fall into the category of Municipal/Domestic, Industrial, Agricultural or Solid Waste (Class I, II or III)		
Facility Status:	Active - Any facility with a continuous or seasonal discharge that is under Waste Discharge Requirements.		
Agency Type:	Special District (Includes districts established under general acts, sanitary districts, water districts irrigation districts, etc.)		
Waste Type:	Miscellaneous (Includes wastes from dewatering, recreational lake overflow, swimming pool wastes, water ride wastewater, ground water seepage and other wastes of this type) - Designated/Influent or Solid Wastes that pose a significant threat to water quality because of their high concentrations (E.G., BOD, Hardness, TRF, Chloride). 'Manageable' hazardous wastes (E.G., inorganic salts and heavy metals) are included in this category.		
Threat to Water:	Minor Threat to Water Quality. A violation of a regional board order should cause a relatively minor impairment of beneficial uses compared to a major or minor threat. Not: All nurds without a TTWQ will be considered a minor threat to water quality unless coded at a higher Level. A Zero (0) may be used to code those NURDS that are found to represent no threat to water quality.		
Complexity:	Category C - Facilities having no waste treatment systems, such as cooling water dischargers or those who must comply through best management practices, facilities with passive waste treatment and disposal systems, such as septic systems with subsurface disposal, or dischargers having waste storage systems with land disposal such as dairy waste ponds.		
Reclamation:	No reclamation requirements associated with this facility.		
POTW:	The facility is not a POTW.		
NPDES Number:	CAG9940 The 1st 2 characters designate the state. The remaining 7 are assigned by the Regional Board		
Subregion:			4
Frequency of Reporting to Regional Board:			Quarterly Submittal
Resource Conservation and Recovery Act (RCRA) Facility:			No
Project Official's Initials:			Not reported
