Matrix Oil Corporation
General Partner Operations/Executive Vice President
Matrix Oil Management Corporation
General Partner Assets/President
104 W. Anapamu Street, Suite C
Santa Barbara, CA 93101

Re: Approval for Site Clearing

Dear Mr. McCaskey:

This letter constitutes conditional approval for Matrix Oil Corporation ("Matrix") to conduct Site Clearing and Abandoned Well Identification activities at the Proposed Whittier Main Oil Field Project Site under CUP09-004.

This letter shall in no way constitute approval to commence grading or be considered an approval of the grading plans previously submitted. Review of all compliance plans submitted by Matrix in satisfaction of the conditions of approval is limited to this subphase of the Project and additional reviews and approvals would have to occur for future subphases of the Project. This approval is limited to only those activities listed below:

- Removal of vegetation along fuel modification areas identified within the Habitat Mitigation and Monitoring Plan Testing Phase (HMMP) submitted January 22, 2013 Figure 2, totaling 1.21 acres;
- 2. Removal of Vegetation within the Test Well Site Plan as indicated in the HMMP Figure 2, totaling 1.99 acres (attached as Exhibit A to this approval letter);
- 3. Removal of Vegetation within the Proposed Paved Widened Access Road as indicated in the HMMP Figure 2, totaling 0.03 acres;
- 4. Placement of vegetative materials at the location determined by the Habitat Authority; and,
- 5. Disturbance of surface soils within the above defined Test Well Site Plan only to the extent necessary to determine the location of abandoned wells from the previous oil field operations.

The activities are subject to the following conditions:

- a. All activities at the site shall be in compliance with the Conditions of Approval as established by the City Council Resolution #8423 from November 28, 2011;
- b. All activities at the site shall be in compliance with the Mitigation Monitoring Plan from the Final Enviornmental Impact Report and amended by the City Council November 28, 2011:
- c. Activities at the site shall adhere to Best Management Practicies ("BMP") to prevent pollution to local waterways, and prevent sediments, construction debis and trash from being washed into storm drains causing pollution to local waterways;
- d. Site conditions during and after vegetation removal and soil disturbance shall implement erosion control BMP as directed by the City inspectors and these measures shall be maintained until the future date when Test Site grading takes place;
- e. The Operations Manual, Emergency Response Action Plan, Oil Spill Contingency Plan and the Storm Water Pollution Prevention Plan shall require a second approval by the City and the Habitat Authority prior to Test Site grading;
- f. Measures as specified in the Operations Manual (allowed construction hours, etc) are applicable; and,
- g. Notification to the City and Habitat Authority shall be required for planned site activity, with details regarding the duration, type of activity and focus area of such activity.

This approval is limited in duration to 30 days from the date above.

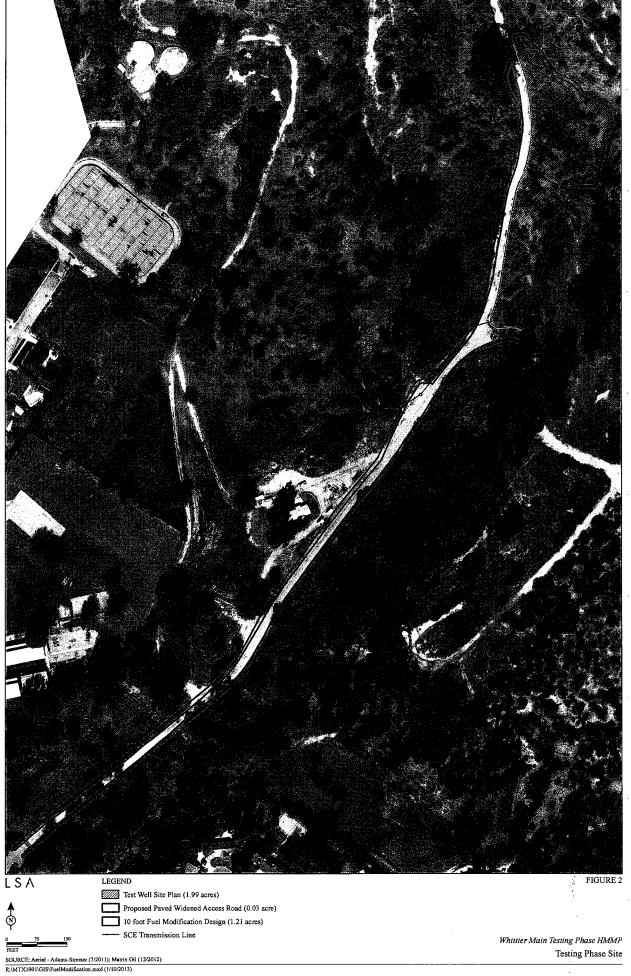

Respectfully,

Jeffrey W. Collier City Manager

CC:

Aldo E. Schindler, Director of Community Development David Pelser, Director of Public Works
