Hello, I am a member of the community of Whittier. I am a high school student attending Whittier High, I recently saw that all 113 trees will be removed from Greenleaf to Wardman Streets. As a young member I would like to have my two cent in. The trees have been an important part of Whittier, in fact they are the reason I live here now. My parents fell in love with the amount of nature and the size of the trees. For someone who grew up here walking around and memories made along side the trees is displeasing. Not only will it upset the community it will have negative effects. I don't need to tell you what trees do for the carbon exchange, I ask that you simply hear the words of the community and take back the approval.
