To whom it may concern,

I have just read of the removal of the trees along green leaf , and I am genuinely appalled at this concept. Not only do those tree provide shade that make the road a normal temperature in the beaming summer sun, but they are a huge part of what make Whittier beautiful. When I moved to Los Angeles in 2015, Whittier was my first home and I would walk the streets of green leaf in awe of the trees. I had never seen anything like them, and it makes me angry to the core to know they will be destroyed and replaced with smaller trees. I ask you to PLEASE reconsider this decision.
