What a brilliant idea. for cutting down on foot traffic along the major commercial area in uptown Whittier. Do away with pesky pedestrians who might stop into shops and restaurants while out for a stroll and spend time and money in local establishments.. Do away with shade making the area comfortable. Do away with the clutter that may be left behind. Do away with places neighbors like to gather. Makes it into more of a ghost town which may bring more people in for Halloween.

Nice going Council members!
