my routine all these years. The promenade allows me to bring my family, especially children to uptown without being fearful of car traffic. I feel the uptown area is more accessible, communal and unique with the loss of car traffic on Greenleaf. With the brewery and all the great restaurants specifically on the promenade area are beneficial to our community. It allows freedom to walk , shop, eat and drink without the claustrophobic atmosphere. Uptown whittier is small, it's always been cramped and being able to eat outside and walk around without having to deal with the car traffic is awesome. I encourage the city council to keep this a permanent fixture in our community. The business owners love it and this 20+ year whittier resident love it. Thank you for your time
