Hello,

I was not able to attend the special city council meeting. I would like to ask that the city consider making the Green Leaf promenade a pilot of green redevelopment in the city through the use of cool coatings, green roofs, and features that collect storm water (bioswales, curb cuts, dry wells, detention basins, and when possible the use of captured and recycled water). Additionally, given the lack of awareness of our local flora and the benefit to native pollinators, I suggest design and landscaping highlight and use native plant species. I appreciate the focus on walkability and pedestrian safety and encourage the team to provide as much shade to pedestrians visiting the area given how hot our city has become and the public health benefits of trees.
