You guys did a FANTASTIC JOB screwing up Lambert with that new death trap bike path.. yes death trap.. you have a homeless shelter not far from the beginning of the bike path a lot of homeless people on the bike path when I'm on the bike path with my daughter and someone tries to go after us. We have no way out because there's walls and backyards and then a big ass gate you put in the way, so I have to hope we make it out to the signals are completely screwed up. I've emailed several times about those and you guys haven't done anything about that now you wanna fuck up uptown even more than you already have you close the street down for Covid no one can get through completely killed going to uptown Whittier for me now you want to destroy even more make it hot ugly get rid of trees, because you don't want to take care of them. I know why you guys are doing this you're trying to get out of doing repairs and taking care of the trees repairing sidewalks, repairing buildings things you should do instead of destroying the environment.  
Do better Whittier!!!! DO BETTER WHITTIER!!!!  
Jennifer
