Greetings, my name is Laura Zavala. I was scheduled to speak out today, but 2 other families and my self had to leave because we have children that go to school tomorrow morning.

I hope I can share the points that I wanted to present in person and be taken into consideration.

1. My name is Laura Zavala. I am a concern parent. I am here in behalf of my child. I am here to speak for the tress who can't speak for them selfs.
2. I was raise in south central & east Los Angeles where I grew up around factories & NO TRESS!! I know first hand what it is to grow in an urban desert.
3. Until I moved to whittier to raise my child for a better future. The first thing I feel in love was the tress & parrots that migrates every year.
4. My family and I enjoy all the year long activities that are offer in uptown Whittier, but don't see it happening with no shade during the car shows or summer activities.
5. To take away the tress is to take the away the opportunity of a better future for generations to come.
6. We get more done when we work together. We need a second opinion from a company that doesn't lack Creativity or PROBLEM SOLVING skills to protect the TRESS! We can even make the project in 3 phases so it doesn't affect the business.
7. But the city manager would rather prioritize profit over finding the solution to save the tress & have clean air for us all.
8. He has no interest in our city, so we need to VOTE & ELECT someone is office who represents our core values as a community.
9. We don't need to cut more tress we need MORE TRESS TO HELP WITH GOBAL WARMING & the heat that will be coming this summer!

Sincerely,
Laura Zavala
