Public comment,

Why was the original Streetscape Plan, after years of studies and a complete plan for all of Uptown at a cost of millions of dollars, replaced by the Greenleaf Promenade, and who was the author of this new Greenleaf Promenade plan?

Why has no other location in Uptown been studied for a possible Promenade, has there been a study to seek out the most optimal location for the Greenleaf Promenade and what is the projected profit for these businesses in Uptown on Greenleaf Ave and in the Uptown Commercial District as a whole?

Where is the data coming from?

What data was requested by the City Council to be researched and is it to solely support the Greenleaf Promenade at its current designation?

What data supports the removal of over 100 trees in Uptown?

What is the instruction given by the city council to focus on in regards to the trees in Uptown?

I requested information, FOIA, pertaining to all emails regarding the original Streetscape Plan and the Greenleaf and not all documents were provided to me because there should be an email I sent regarding the Promenade included and it is not part of the documentation the city provided me per my request, which indicates that I did not receive all the information per FOIA.

Today through this public comment, I am requesting all the information mentioned in this email as an official FOIA request.

Sincerely,

Rolando Cano
